

MANAGEMENT ESSENTIALS TRAINING

Preparing responsible and resourceful leaders

This proven program accelerates leadership development and organizational performance by enhancing knowledge of key management principles and practices. Employees at all levels learn how to apply executive mindsets, processes and communication tools to reach their full potential as extraordinary leaders.

Building Stronger Organizations – Leader by Leader

Our goal is to help leaders grow in confidence and develop new capabilities to create positive change, and give them the tools to solve complex problems, accelerate workforce productivity, and generate sustainable results. We don't believe in a one-size-fits all approach; that's why we tailor to meet your organization's goals, timelines and resources.

The program incorporates a variety of techniques to maximize participant engagement. We use group-led discussions, Socratic methods, hands-on exercises, instructional videos, and role-playing. Integrating real-life workplace challenges promotes collaboration among learners and makes the learning highly relevant. Key elements of the program include:

- Pre-Program Evaluations
- Temperament Assessment
- Practical Application Assignments
- Post-Program Evaluation
- Competency Comparison Report

Our Clients' Perspectives

We know that our proprietary principles, training methods and programs work because we have put them to the test. Here are some of the successes our clients have achieved through our programs.

"The sessions with Nally Ventures all built upon each other and gave me a collection of options that allows me to be an effective leader—it's a full-package experience."

Jennifer U., COO

"Any time we're in training, the thing that I like the most is the time we spend applying training concepts to specific issues that we have. As an executive coach, Mike is able to take the complicated and turn it to the simple."

Rebecca S., COO

"Through the training, the team gained self-reflection and increased confidence. They recognized their own shortcomings and challenged themselves to improve in those areas."

Glenn D., Principal

Program Topics

- **Introduction & Skills of Effective Managers**
 - Identify the role of managers.
